A5

Unparalleled Access

The Mimosa A5 access point delivers cutting-edge multipoint technology for service providers to affordably deliver the industry's first scalable gigabit wireless broadband network.

Fiber Speed Access

Capable of delivering the speed business users and consumers need at a fraction of the cost of delivering fiber to the premise.

Network-Wide Cloud Control

Mimosa Cloud makes deployment a breeze, interacting with devices network-wide to proactively assist the A5 to optimize network and subscriber experience for the best performance and capacity management.

Smart Quad Panel

Experience unprecedented coverage and gain with the first directional MIMO technology providing four individual 90° panels that uniquely transmit MIMO streams only in the direction of a desired client. The access point is also freed up to simultaneously transmit to an additional client in a different direction.

Working Above the Noise

Advanced Auto-Gain Control techniques automatically squelch out underlying interference with only 10 dB of operating margin required to deliver incredible client performance.

Compact and Fast

With up to 1.5 Gbps of total capacity, the Mimosa A5 is the industry's fastest multipoint solution in a tiny form factor, making suburban rooftop or urban installation a fast, easy and discrete solution.

Network Scalability Perfected

Unique integrated high precision GPS Sync technology allows every deployed device to be collaboratively synchronized across the network, allowing easy channel reuse to save spectrum network-wide.
